

a comprehensive, phased project plan for implement

Document Type: Project Plan

Generated: July 12, 2026

Executive Summary

Establish a comprehensive, phased project plan for implementing and launching an AI-powered customer support chatbot tailored to a mid-sized e-commerce platform, ensuring seamless integration, clear team ownership, risk mitigation, and measurable success metrics.

Key Assumptions

- The e-commerce company uses a standard modern platform (e.g., Shopify, Magento, or WooCommerce) with accessible APIs.
- The chatbot will handle tier-1 support queries (order tracking, return policies, FAQs) and hand off complex queries to live agents.
- The target timeline for full deployment is 12 weeks.
